Comments (HC-hydrocarbon producing)
Kern River is non HC exempt, Chanac is HC exempt. Well is inside the productive limits of the field. The well has been Idle since February 2006 and the injection project has been rescinded back in 2008.
The well used to be a WD well, then converted to a WS (Water Supply) well. It is now an Oil & Gas well (OG). Is is no longer a UIC well.
The well is injecting into the Santa Margarita only, which is non HC exempt within the primacy field boundaries. The well is located inside those boundaries.
The Vedder is HC exempt in the field/area. The well is located inside the productive limits of the field.
The Vedder is HC exempt in the field/area. The well is located inside the productive limits of the field.
